

Hillsborough High School Class Of 2012 College Bound and Fire Safe

An Estimated 3800 University Housing Fires Occur Annually
These Fires Have Resulted in 146 Deaths Since 2000

Approximately two-thirds of the students live in off-campus housing.

The common factors in off campus housing fires are:

- Lack of automatic fire sprinklers
- Missing or disabled smoke alarms
- Careless disposal of smoking materials
- Impaired judgment from alcohol

The following are a few good questions to ask before moving on campus or signing a lease:

- Are working smoke alarms and carbon monoxide alarms installed
- Are there at least two ways to exit your bedroom and your building?
- Is a sprinkler system installed and maintained?
- Does the building receive annual fire inspections

When Packing For College, Don't Forget
A Smoke Detector and Carbon Monoxide Alarm
IT MIGHT SAVE YOUR LIFE!
